Schematic representation of five key challenges and the main ways in which FTA tackles them

- **Nature**
  - Climate Change
    - Accelerating rates of deforestation and forest degradation
  - Biodiversity Loss
    - High prevalence of degraded land and ecosystem services
  - Food
    - Unsustainable land use practices widespread

- **People**
  - Persistent rural poverty with increasing levels of vulnerability
    - People provided with additional means to exit poverty
  - Rising demand & need for nutritious food for both current and future generations
    - People provided with additional means to improve their FSN

- **FTA**
  - Landscapes better managed
  - Forests under protection from deforestation and degradation
  - Land under restoration
