VILLAGE FIELD SCHOOLS FOR SUSTAINABLE OIL PALM SMALLHOLDERS (SEKOLAH KAMPUNG PETANI SAWIT LESTARI)

Driving sustainable palm oil trade by improving the practices, legality and productivity of oil palm smallholders

Background

Palm oil is a key sector in Indonesia’s economy. However, current production and trade practices result in trade-offs between economic and conservation goals (Purnomo et al. 2022a). The growing movement towards sustainability in global trade is driving a restructuring of sustainability practices in Indonesia’s palm oil sector (Purnomo et al. 2022b). Compliance with sustainability standards is the general measure of changes in sustainability practices and palm oil production. Independent smallholders’ inability to meet sustainability standards threatens them with alienation from formal markets (Schoneveld et al. 2017).

CIFOR-ICRAF (Center for International Forestry Research-World Agroforestry Center), in partnership with Jikalahari (Jaringan Kerja Penyelamat Hutan Riau or Riau Forest Rescue Network), is working closely with the Pelalawan Regency Government to improve

sustainability practices in palm oil production and trade through the Sekolah Kampung Petani Sawit Lestari or Village Field Schools for Sustainable Oil Palm Smallholders programme. The programme is aimed at building independent smallholders’ technical, networking and institutional capacities. We expect these improved capacities to result in higher productivity, more efficient use of land resources, and stronger capacity to comply with sustainability principles and practices in palm oil production and trade. Finally, we hope this programme can contribute to reducing pressures on forests from oil palm expansion.

Programme objectives and outcomes

The programme will equip independent oil palm smallholders with the capacity and necessary practices to produce and trade sustainable palm oil. In doing so, it aims to achieve the following:

1. Enhance the awareness and active participation of smallholders in advancing sustainable oil palm plantations;
2. Improve smallholder oil palm plantations’ sustainability practices, legality, production and trade;
3. Increase the sustainability of local economies by optimizing land use efficiency to reduce the risk of forest and land fires while improving capacity to secure sustainability certification and access to markets.

Programme location

The programme is being implemented in Segati Village, Langgam Subdistrict, Pelalawan Regency.

## Programme activities

<table>
<thead>
<tr>
<th>No.</th>
<th>Activities</th>
<th>Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Program outreach</td>
<td>To build consensus or agreement between the village government, oil palm smallholders and communities on protecting forest, sustainable oil palm plantation management, and sustainable trade</td>
</tr>
<tr>
<td>2.</td>
<td>Database development and independent smallholder mapping</td>
<td>To map and identify independent oil palm smallholders inside and outside the forests estate</td>
</tr>
<tr>
<td>3.</td>
<td>Establishing independent smallholder groups</td>
<td>To facilitate the development of institutions and capacity building on sustainable palm oil at the smallholder group level</td>
</tr>
<tr>
<td>4.</td>
<td>Registering independent smallholder groups</td>
<td>To facilitate the formal registration of independent smallholder groups in the government’s SIMLUHTAN agricultural extension management information system to ensure extension from the government beyond the programme duration</td>
</tr>
<tr>
<td>5.</td>
<td>Training on Good Agricultural Practice (GAP) and High Conservation Value (HCV)</td>
<td>To improve independent smallholder capacity in Good Agricultural Practice (GAP) and High Conservation Value (HCV)</td>
</tr>
<tr>
<td>6.</td>
<td>Study visit to the Amanah Group (an ISPO- and RSPO-certified independent smallholder group)</td>
<td>To facilitate exchanges of knowledge, information and experience, and to motivate smallholder groups</td>
</tr>
<tr>
<td>7.</td>
<td>Formulating a roadmap and business model canvas on sustainable palm oil practices, production and trade at the independent smallholder level</td>
<td>To facilitate the development of a roadmap and strengthen business models in sustainable palm oil practices, production and trade</td>
</tr>

CIFOR-ICRAF brings more than 75 years of experience in harnessing the power of trees, forests, and agroforestry landscapes to address the most pressing global challenges of our time – biodiversity loss, climate change, food security, livelihoods and inequity. CIFOR and ICRAF are both international organizations and CGIAR Research Centres.
