## REDD+ emerging? What we can learn from subnational initiatives

Expectations for REDD+ are high, and the challenges are daunting. Controversies will persist until there is sufficient evidence on implementation – what works, what doesn't, what changes are needed for REDD+ to succeed in practice.

Join the panelists in a discussion of evidence and experiences from the ground, including perspectives from the Governors' Climate and Forests Task Force; a CIFOR case book based on 23 initiatives in six countries; Indonesia's integration of initiatives in a national framework; and a Brazil subnational initiative in São Felix do Xingu.

### Moderator

**William Boyd**

Senior Advisor and Project Lead  
Governors' Climate and Forests Task Force

### Opening

**Peter Holmgren**

Director General  
Center for International Forestry Research

### Panelists

**William Sunderlin**

Principal Scientist  
Center for International Forestry Research

“REDD+ on the Ground”:  
Lessons from CIFOR's global  
comparative study  
([cifor.org/redd-case-book](http://cifor.org/redd-case-book))

**Heru Prasetyo**

Head  
Indonesian REDD+ Agency

Where is REDD+ going  
in Indonesia? A focus on  
subnational initiatives

**Marcio Sztutman**

Conservation Manager – Brazilian Amazon  
The Nature Conservancy

Advances and challenges of  
implementing REDD+ at  
São Felix do Xingu

Following the panelists' presentations, two representatives of the Governors' Climate and Forests Task Force will make a brief statement:

- **Magdalena Ruiz**, Secretary of Environment & Territorial Development, Jalisco, Mexico
- **Monica De Los Rios**, Head, Regulatory Department of Environmental Services, Institute of Climate Change, Acre, Brazil
