Sustainable Landscape Rating Tool

• Rapid assessment of jurisdictional policy and governance conditions

• Workshops with local stakeholders in jurisdictions to validate (and revise) the SLRT results
“...to boost the alignment of incentives and jurisdictional performances...”

Promote application of the SLRT Framework through jurisdictional profiles in 5 LTKL member districts

Increase alignment between SLRT principles and guidance with jurisdictional based indicators (KDSI and other benchmarking system, e.g. VSA and Landscape)

Collaborate joint narrative to promote connect district performance and global incentive networks from public and private source

Online workshop
Transforming REDD+ in Indonesia
