

# LIST OF AWARDED CONTRACTS ABOVE USD 15,000

1 Jun 2022 VERSION 1.6

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
1	Kunming Institute of Botany	China	2021	To co-organize a scientific conference to make the state of the evidence towards the next COP of CBD. The conference will address the theme of forests, trees and agroforestry for diverse sustainable landscapes, in the marching-up to CBD 15	USD	45,000
2	The Center for People and Forests (RECOFTC)	Thailand	2021	RECOFTC contributes to the development of a full project proposal document titled "Scaling Responsible and Inclusive Business Innovation in Agricultural Land Investment that Supports Rights, Livelihood and Sustainable Food Systems"	USD	51,298
3	SNV - Netherlands	Netherlands	2021	SNV contributes and develops the development of a full project document with other consortium members.	USD	73,597
4	Direction Générale de l'Economie Verte et du Changement Climatique	Burkina Faso	2021	Co-hosting the event "National Forum for Reflection on the Shea Sector in Burkina Faso"	XOF	11,056,000
5	University of Stirling	United Kingdom	2021	To increase and expand the post-doctoral staff time allocated to data management and analyses in carrying out work towards the wildmeat consortium's objectives and in preparing new datasets for the wildmeat database and analysing these new datasets	EUR	19,814
6	Food and Agriculture Organization (FAO) - Forestry Department	Italy	2021	To develop a strategy and implementation plan for the UN Decade on Ecosystem Restoration	EUR	491,550
7	UN Environment Programme	Kenya	2021	To develop a strategy and implementation plan for the UN Decade on Ecosystem Restoration	EUR	479,950
8	Zambia Statistics Agency	Zambia	2021	To carry out a wild food collection survey in Zambia	USD	169,507
9	World Agroforestry (ICRAF) - Headquarters	Kenya	2021	ICRAF will provide technical support to the project and support capacity development activities. Specifically, ICRAF will contribute to developing action plans by supporting the articulation of mechanisms to resolve CSC adoption barriers and contribute to capacity development activities on CSC. Drawing on its longstanding engagement with key industry actors in the Ghanaian cocoa sector, ICRAF will play an important role in mobilizing diverse stakeholder groups and ensure effective out scaling.	EUR	58,008
10	World Agroforestry (ICRAF) - Headquarters	Kenya	2021	To contribute and develop the development of a full project document with other consortium member.	USD	26,132
11	Nong Lam University	Viet Nam	2021	<ul style="list-style-type: none"> <li>To conduct research on mangrove governance and willingness to pay for mangrove protection in Southern part of Vietnam</li> <li>To understand institution for financial management related to operationalising PFES scheme (who will pay, how much, how money will be collected and distributed and how mangrove environmental services will be monitored and assessed?)</li> <li>To engage a wide range of stakeholders (for example, natural resource managers, non-governmental organizations, collaborating scientists, and small land owners) in outreach and capacity development at all scales of mangrove governance and use.</li> </ul>	USD	40,781
12	Temple University	United States of America	2021	Supporting the government of Peru in mapping and assessing degradation of palm swamp peatlands in the Amazon region	USD	34,346

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
13	Rationale Advisors - LOA	Singapore	2021	Continue to engage in task related to CIFOR-ICRAF Climate Change Strategy, UN Climate Negotiations, Green Climate Fund, Transformational Change, Strategic Partners, Communications, and other matters required by the CCE Team and FTA FP5 Leaders.	USD	26,400
14	Centre de Coopération Internationale en Recherche Agronomique pour le Développement (CIRAD) UMR MOISA	France	2021	To prepare a synthesis of the multiple MSPs established during the period 1990-2018 to make it easier to access a vast and rapidly-expanding literature.	EUR	16,545
15	Centre for International Sustainable Development Law (CISDL)	Canada	2021	To finalize a Cambridge University Press book manuscript - CITES as a Tool for Sustainable Development	USD	20,000
16	Center for Research and Sustainable Community Development	United States of America	2021	<ul style="list-style-type: none"> <li>Identify important political/socio/economic/health issues and value chain related to wildlife trade/farming in Thua Thien Hue Vietnam, particularly related to impact on indigenous women</li> <li>Identify key actors (women and men) engaged in wildlife trade and wildlife farming in the region</li> <li>Identify studied sites in consultation with local government, NGOs/CSOs/ academia</li> <li>Understand stakeholders' perceptions on the linkage between COVID-wildlife trading/farming and communities health, particularly on indigenous women</li> <li>Understand stakeholders' perceptions on the effectiveness of current policies and projects and their institutional setting (e.g. rule of games, distribution of powers and benefits, capacity of government officers) in addressing wildlife trade and wildlife farming in general and in response to COVID in particular and how this has impacts on indigenous women</li> <li>To inform CGIAR team on Bushmeat/Wildlife team on studied sites, prioritise research topics and project stakeholders analysis for the implementation phase</li> </ul>	USD	16,820
17	Centro de Investigaciones Sociológicas, Económicas, Políticas y Antropológicas of the Pontificia Universidad Católica del Perú	Peru	2021	Participate in GCS REDD+ work in Peru with a focus on work package 4, in close coordination with global and national research team members and partners. PUCP staff will also participate in research towards work package 3.	USD	59,786
18	University of Helsinki	Finland	2021	The partner will contribute to WP3 - Bringing out the politics: understanding and enlarging the policy space; WP4 - Linking science, policy and politics for forest based climate action; WP5 - Sharing evidence and experiences especially on the Output 3.1 Analysis of the politics of continued deforestation and forest degradation and Output 4.3 Science-policy platforms.	USD	101,977
19	Centro de Inteligência Territorial	Chile	2021	This LoA relates to the following work packages (WPs) and set of activities: WP4. Linking science, policy and politics for forest-based climate action, specifically 4.2 Scenario building.	USD	370,470
20	Bioversity International	Italy	2021	The partner will contribute to the implementation of the Women Land Rights Initiative IFAD project, specifically in the implementation of work in Kyrgyzstan and the completion of Knowledge Management activities under Component 2.	USD	570,807

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
21	Research Center for Climate Change - Universitas Indonesia	Indonesia	2021	This LoA relates to the following work packages (WPs) and set of activities: WP2. Tracking and assessing actions: 2.2 Mapping and assessing REDD+ finance and benefit-sharing mechanisms WP4. Linking science, policy and politics for forest-based climate action: 4.3 Science-policy platforms	IDR	892,647,500
22	World Agroforestry (ICRAF) - Headquarters	Kenya	2021	Carry out joint activities among ICRAF and CIFOR within WP 1, 2, and 4 with an objective of achieving the following overarching outcome: Policy makers and practitioners in key tropical forest countries design and implement effective, efficient and equitable (3E) forest-friendly policies and actions, based on the knowledge and capacities co-developed through this project.	USD	175,061
23	Wageningen University & Research (WUR)	Netherlands	2021	<ul style="list-style-type: none"> <li>Carry out joint activities among the Laboratory of Geo-information and Remote Sensing (Wageningen University) and CIFOR within WP1. More specifically contributing to the following activities:</li> <li>Output 1.1.1: Identification of policy relevant archetypes of deforestation and forest degradation</li> <li>Output 1.2.1: Assessment of the use of new technologies and data (e.g., near-real time monitoring, synthetic aperture radar, etc.) for better resource management and more frequent reporting on LULUCF GHG emissions and removals, and how this can contribute to increased participation, transparency and accountability</li> </ul>	USD	62,849
24	International Center for Tropical Agriculture	Colombia	2021	<p>Carry out joint activities among CIAT and CIFOR within WP1. More specifically contributing to the following activities:</p> <ul style="list-style-type: none"> <li>Assess non-Annex 1 Parties' progress on NDC reporting with specific attention to the fulfilment of requirements for TACCC for the communication of progress in AFOLU mitigation actions. The analysis will show how Parties and technical support mechanisms can support improvement of national reporting, explore new data sources, and increase transparency, accuracy, completeness, consistency, and comparability between national reports towards the global stocktake.</li> <li>Assess the intactness of stable forests, particularly focused on small-scale disturbances in areas covered by the RADD-Alert data. Identify vulnerable areas where small-scale disturbances are increasing.</li> <li>Provide a full GHG accounting of stable forests using publicly available datasets, published literature, and remote sensing tools in a spatially disaggregated a manner as possible</li> </ul>	USD	118,881
25	The Institut de Recherche en Ecologie Tropicale (IRET)	Gabon	2021	To support the implementation of the project 'Creating an Evidencebase for developing and evaluating interventions to reduce unsustainable bushmeat hunting in Central Africa'.	USD	35,600

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
26	University of Stirling	United Kingdom	2021	<ul style="list-style-type: none"> <li>Develop an evidence-base of hunting offtakes, wildmeat trade and consumption for governments, funders, and civil society in Central Africa, available to inform decisions and policies at all Levels.</li> <li>Develop indicators and methodologies for project, national and regional-level monitoring of bushmeat use.</li> <li>Embed the evidence base and monitoring systems within regional policy frameworks</li> </ul>	2021	138,700
27	Nong Lam University	Viet Nam	2021	<ul style="list-style-type: none"> <li>To conduct research on mangrove governance and willingness to pay for mangrove protection in Southern part of Vietnam;</li> <li>To understand institutional arrangements for financial management related to operationalising PFES scheme</li> <li>To engage a wide range of stakeholders in outreach and capacity development at all scales of mangrove governance and use</li> </ul>	USD	19,185
28	Cocoa Health and Extension Division (CHED)	Ghana	2021	To convene public, private and civil society stakeholders relevant to the cocoa sector to design a strategy for sustainable cocoa which includes scaling climate-smart practices, improving access and uptake of agricultural supplies and services, and aligns with Kwaebibirem Municipality and Atiwa West District development priorities.	EUR	15,716
29	Council for Scientific and Industrial Research - Oil Palm Research Institute of Ghana	Ghana	2021	To organise and coordinate an Oil Palm Working Group that will be comprised of stakeholders from Kwaebibirem Municipality and Atiwa West District of the Eastern Region, Ghana. The purpose of the Working Group will be to deliberate approaches and constraints to sustainable oil palm production with a reduced forest footprint and design a development strategy for the oil palm sector in the Kwaebibirem-Atiwa West landscape	EUR	15,716
30	Lancaster University	United Kingdom	2021	<ul style="list-style-type: none"> <li>To provide Atewa Landscape platforms the type of empirical evidence needed to design actionable and desirable pathways for reducing the negative environmental footprint of smallholder commodity production that provide tangible social co-benefits.</li> <li>To support the project in communicating this evidence to global audiences through development of scientific products</li> </ul>	EUR	108,009
31	Tropenbos - Ghana	Ghana	2021	To organise Conference Sustainable Woodfuel Value Chains in Africa: Governance, Social, Economic and Ecological dimensions. 23 - 25 November 2021, Kumasi, Ghana.	USD	15,000
32	Universitas Diponegoro	Indonesia	2021	<ul style="list-style-type: none"> <li>Quantifying the intake, adequacy of macro and micro nutrients, as well as food diversity of several important food groups for mothers and toddlers aged 24-59 months in coastal areas.</li> <li>Assessing the contribution of mangroves to intake, adequacy of macro and micro nutrients, food diversity of several important food groups for mothers and toddlers aged 24-59 months in coastal areas.</li> <li>Assessing household food security of families with children aged 24-59 months in coastal areas. 4. Assessing the contribution of mangrove to household food security of families with toddlers aged 24-59 months in coastal areas</li> </ul>	IDR	357,197,500

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
33	Wageningen University & Research (WUR)	Netherlands	2021	This partnership concentrates on the Outcome 1 and 2 of the Indonesia FREL project, specifically focusing on Outputs 1.5 and 2.4. Output 1.5: Improved FREL 2016 estimates - It includes improved FREL 2016 estimates with associated documentation on how it has been produced, including a description of activity data and selected IPCC default EFs, for each land activity and for each pool. Output 2.4: Improved FREL 2021 estimates - It includes estimates produced by combining Tier 2 EF and improved AD for the identified missing forest sources/sinks.	USD	42,000
34	Universitas Brawijaya	Indonesia	2021	The aims of this research are: <ul style="list-style-type: none"> <li>Quantifying the intake, adequacy of macro and micronutrients, as well as food diversity of several important food groups for mothers and toddlers aged 24-59 months in coastal areas.</li> <li>Assessing the contribution of mangroves to intake, adequacy of macro and micronutrients, food diversity of several important food groups for mothers and toddlers aged 24-59 months in coastal areas.</li> <li>Assessing household food security of families with children aged 24-59 months in coastal areas.</li> <li>Assessing the contribution of mangrove to household food security of families with toddlers aged 24-59 months in coastal areas.</li> </ul>	IDR	421,714,975
35	Laboratoire de Recherches Appliquées (LRA), ESSA Forêts	Madagascar	2021	The partner is responsible for project goals in Madagascar <ul style="list-style-type: none"> <li>To increase understanding and national/ subnational capacity on community based tenure systems and tenure security in FLR adoption.</li> <li>To develop and implement practical ways to overcome barriers to secure tenure, FLR and food security with multiple actors (e.g. women, villages, different levels of government, GIZ/NGOs); and 3) to foster policy reform in favor of community tenure security by carrying out the activities and outputs defined in the proposal in collaboration with the CIFOR research team</li> </ul>	EUR	192,358
36	Ingénierie du Développement Durable	Cameroon	2021	The partner is responsible for project goals in Cameroon (building capacity for FLR, developing an FLR action plan, supporting country exchange and models for upscaling) by carrying out the activities and outputs defined in the proposal in collaboration with the CIFOR research team	EUR	116,890
37	Fondation Energie pour le Monde (Fondem)	France	2021	CIFOR is entering a partnership with "Fondation Energies pour le Monde" (FONDEM) for the implementation of the third component of the INNOVACC project. The third component of the INNOVACC project aims at improving energy access of rural households that are not linked up with an electricity network and therefore rely on fossil energy and/or tree biomass. The project will target communities that need a reliable and sustainable source of energy for their social and economic development induced by activities related to climate change adaptation.	EUR	411,000
38	TheTreeMap	France	2021	Understanding drivers and risks of fires in boreal forest and tundra biomes above the Arctic Circle (>66.5°) in Central and Eastern Siberia, in Khabarovsk and Primor'ye federal units, and in the tropical forests and peatland ecosystems of Kalimantan.	EUR	38,000

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
39	Centre for International Co-operation in Sustainable Management of Tropical Peatland	Indonesia	2021	<ul style="list-style-type: none"> <li>Conduct reviews of previous studies and collect available climate data, aerial photography, satellite data, land use change and remote sensing analyses of past forest fire. Install and maintenance of PM 2.5 and CO monitors in schools, villages, relevant sites and test and continue data collection.</li> <li>Conduct and collect necessary data of social and health impacts of fire and haze with collaboration with local medical specialists. Acquires necessary permissions and develop procedures to conduct epidemiology study for haze impacted population. Conduct to adapt research methods to local contexts and set the logistics required for effective fieldwork.</li> <li>Conduct reviews and pilot studies of forest and peatland ecosystem restoration, forest protection and conservation activities to mitigate forest fire. Study of National, provincial and local forest fire reduction and mitigation plans in study area</li> </ul>	USD	45,000
40	Federal State Budgetary Institution of Science Khabarovsk Federal Research Center	Russian Federation	2021	<ul style="list-style-type: none"> <li>Conduct reviews of previous studies and collect available climate data, aerial photography, satellite data and remote sensing analyses of past wildfires. Start administrative process to install PM 2.5 and CO monitors and test data collection once it approved.</li> <li>Conduct preliminary studies of social and health impacts of fire and haze and initiate collaboration with local medical specialists. Acquires necessary permissions and develop procedures to conduct epidemiology study. Conduct to adapt research methods to local contexts and set the logistics required for effective</li> </ul>	USD	75,000
41	World Agroforestry (ICRAF) - Headquarters	Kenya	2021	<ul style="list-style-type: none"> <li>To enhance the capacity of Landscapes For Our future Initiative stakeholders to effectively deliver on their country/regional Actions;</li> <li>To inform the development of enabling sustainability policies, strategies and programmes for implementation of more effective and sustainable ILM initiatives and approaches at scale.</li> </ul>	USD	2,206,717
42	Kemitraan Bagi Pembaruan Tata Pemerintahan	Indonesia	2021	The objective of this partnership in the preparation phase is to find a detailed agreement on the full proposal package, and in particular on KEMITRAAN's role and budget for implementation of the SAGU project. To achieve this, KEMITRAAN will provide a critical contribution in developing the project design for the SAGU program. To do so, KEMITRAAN representatives will actively participate in ToC workshops, national kick off meetings, consultation meetings, field missions, knowledge management workshop, budget workshops, coordination workshops and the role-staff workshop. KEMITRAAN will lead the field mission to Papua.	EUR	86,486
43	Global Environment Centre - Malaysia	Malaysia	2021	GEC will provide a critical contribution in developing the project design for the SAGU program. To do so, GEC representatives will actively participate in ToC workshops, national kick off meetings, consultation meetings, field missions, knowledge management workshop, budget workshops, coordination workshops and the role-staff workshop. GEC will lead the field missions to Sarawak and Sabah, Malaysia.	EUR	119,726

#	Partner institution	Partner country	Contract year	Purpose of agreement	Currency	Value
44	Wetlands International - Asia Pacific/ Indonesia Programme	Indonesia	2021	The objective of this partnership in the preparation phase is to find a detailed agreement on the full proposal package, and in particular on YLBA's role and budget for implementation of the SAGU project. To achieve this, YLBA will provide a critical contribution in developing the project design for the SAGU program. To do so, YLBA representatives will actively participate in ToC workshops, national kick off meetings, consultation meetings, field missions, knowledge management workshop, budget workshops, coordination workshops and the role-staff workshop. YLBA will lead the field mission to West Kalimantan	EUR	90,752
45	SNV Netherlands Development Organisation	Netherlands	2021	The objective of this partnership in the preparation phase is to find a detailed agreement on the full proposal package, and in particular on SNV's role and budget for implementation of the SAGU project. To achieve this, SNV will provide a critical contribution in developing the project design for the SAGU program. To do so, SNV representatives will actively participate in ToC workshops, national kick off meetings, consultation meetings, field missions, knowledge management workshop, budget workshops, coordination workshops and the role-staff workshop. SNV will lead the field mission to West Papua.	EUR	106,218
46	University for Development Studies	Ghana	2021	UDS will contribute to the improvement of the landscape approach implementation to sustainable supply of forest-related goods and services and protection of biodiversity outcomes in Ghana	GHS	500,468
47	International Union for the Conservation of Nature (IUCN)	Switzerland	2021	To develop a strategy and implementation plan for the UN Decade on Ecosystem Restoration (UN-Decade)	EUR	685,896
48	International Institute for Applied Systems Analysis (IIASA)	Austria	2021	IIASA will work together with National Wildlife Federation (NWF) in the Côte d'Ivoire case study. With extensive experience in app design and development, and maintaining related spatial data infrastructure, IIASA will seek the benefits of combining citizen science with more traditional approaches to working with spatial information.	EUR	446,275
49	National Wildlife Foundation	United States of America	2021	National Wildlife Federation (NWF) will coordinate the work in Côte d'Ivoire together with IIASA and organize capacity building workshops and engagement activities to increase understanding, encourage alignment with and use of national forest monitoring systems, and encourage robust implementation of deforestation-free cocoa supply chains among major producers and brands.	EUR	269,387
