

LIST OF AWARDED CONTRACTS ABOVE USD 15,000

28 June 2023 VERSION 1.7

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
1	ARCADIA SIT S.r.l.	Italy	2022	ARCADIA will provide high-level expertise in computer science for the maintenance of the OFAC site, various design and architecture work of the site.	EUR	66,000
2	Association of Uganda Professional Women in Agriculture and Environment (AUPWAE)	Uganda	2022	To convene stakeholders (staff, Local Councils, oil palm producers, and affected community members) of the National Oil Palm Project (NOPP) to participate in a gender analysis of land and resource rights in the oil palm producing areas in and around Kalangala and Buvuma. The gender-analysis workshops and participatory focus groups will inform the co-design of gender transformative approaches to further advance the equitable recognition and enjoyment of women's resource rights and enhance benefit sharing within the context of the NOPP and other IFAD-funded projects.	USD	59,634
3	Center of Excellence Peatland Conservation and Productivity Improvement (CoE PLACE) - Universitas Sriwijaya	Indonesia	2022	The overall aim of this research is to conduct participatory action research on restoration of degraded peatland for multiple economic and environmental values such as agri-food, fish, timber and other materials.	IDR	418,420,000
4	Centre de Coopération Internationale en Recherche Agronomique pour le Développement (CIRAD)	France	2022	CIFOR is entering a partnership with CIRAD for the implementation of the INNOVACC project.	EUR	404,244
5	Centre de Coopération Internationale en Recherche Agronomique pour le Développement (CIRAD)	France	2022	Roles of CIRAD in the project: support and training of partners on issues of biodiversity, forest management, impact of economic activities on forests and any other subject related to CIRAD's expertise, supply of scientific data (wildlife, plantations, economy, natural forests...) for the OFAC platform and study development, depending on the needs expressed by users.	EUR	235,500
6	Centro de Inteligência Territorial	Chile	2022	Based on literature review and stakeholder interview and workshops, this study aims to support Amazon to have a better understanding of (i) the national governing bodies, how they interact, and how they engage in REDD+ and (ii) provincial government knowledge and capacity to engage in and implement REDD+ in Brazil. This study also aims to identify gaps in national government capacity to implement REDD+ that need to be addressed.	USD	26,063

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
7	Commission des Forêts d'Afrique Centrale (COMIFAC)	Cameroon	2022	COMIFAC will coordinate relations between the RIOFAC 2 project and its member countries including: - Facilitation of data collection, - The promotion of OFAC publications to which the RIOFAC project will contribute, - Ownership of the results of the RIOFAC 2 project by Central African States, and - The mobilization of private sector and civil society actors during the events organized within the framework of the RIOFAC 2 project.	EUR	292,866
8	Ecole Régionale post-universitaire d'Aménagement et de gestion Intégrés des Forêts et Territoires tropicaux (ERAIFT)	Democratic Republic of Congo	2022	to organise Atelier régional COMIFAC sur la cartographie décimétrique de l'occupation de sol et des types forestiers d'Afrique Centrale au moyen d'images SENTINEL (COMIFAC regional workshop on decametric mapping of land cover and forest types in Central Africa using SENTINEL images) from 21 – 25 February 2022.	USD	25,859
9	Efecca	United Kingdom	2022	1.To make progress on complex technical detail on the FACT roadmap actions. Virtual meetings have served us well, but it is increasingly difficult to work through complex discussions across four different policy pillars with 28 countries. FACT's value will only be realised if the technical workstreams make demonstrable progress and if this is delayed, we risk losing interest and will not secure long-term commitments from other governments. 2. To work with countries to develop a funding strategy for FACT Roadmap implementation, and to agree a more defined shared end vision and objectives that helps structure our work going forward. 3. Relationship building to strengthen ongoing dialogue and rapport between governments, and in the longer term to start to encourage other countries to take on a leadership role, reducing the resources required from HMG.	GBP	180,656
10	ETIFOR S.R.L.	Italy	2022	Test case for selling legal timber: ETIFOR is called to help CIFOR in selling legal timber harvested in the Yangambi forest landscape in Democratic Republic of Congo. The sale of legal timber is essential to have responsible management of the Yangambi forest landscape. Why should people buy legal timber? 1. Because is of better quality (well cut, dry, customised, secure specie) 2. Because is price competitive (no hidden costs) 3. Because it is cool: it saves the planet and the people CIFOR is already working on Points 1 & 2. In this sense, Etifor will support the preparation of selling & marketing material and will run a sales test in Kinshasa and East Congo.	EUR	18,600

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
11	Fondation Energie pour le Monde (Fondem)	France	2022	CIFOR is entering a partnership with “Fondation Energies pour le Monde” (FONDEM) for the implementation of the third component of the INNOVACC project. The third component of the INNOVACC project aims at improving energy access of rural households that are not linked up with an electricity network and therefore rely on fossil energy and/or tree biomass. The project will target communities that need a reliable and sustainable source of energy for their social and economic development induced by activities related to climate change adaptation.	EUR	411,000
12	Food and Agriculture Organization (FAO)	Italy	2022	Transparent Monitoring (TM) can help developing countries to improve monitoring of land use emissions and better assess mitigation actions. The project develops guidance for TM, on how to implement open-source tools and open-access datasets and how to improve data access in four countries. In Côte d’Ivoire, we develop guidance for assessing mitigation along cocoa supply chains to assist an effective and transparent accounting. In Ethiopia, we work towards integration of open-source tools, data and TM principles into the national MRV system to improve the assessment of biomass following land use change and participation of local communities. In Papua New Guinea, we analyze the adoption of open data, of data accessibility policies and the improvement in participation of indigenous peoples and local communities in MRV. In Peru, we develop guidance towards an interactive near-real time forest change monitoring system linked to a national incentive system for forest-related mitigation.	EUR	363,156
13	Forests Resources And People (FOREP) - Cameroon	Cameroon	2022	FOREP will coordinate and lead the data collection for the Boumba Bek site and contribute to survey design and report and paper writing for the overall project.	EUR	26,657
14	Forêt Ressources Management (FRM)	France	2022	Roles of FRM in the consortium: monitoring the management of permanent production forests and monitoring production and the economy of the sectors, participation and support in written, web and cartographic production in the context of the communication of forest and environmental information to users	EUR	840,964

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
15	IUCN, INTERNATIONAL UNION FOR CONSERVATION OF NATURE AND NATURAL RESOURCES	Switzerland	2022	Engage IUCN to organize and coordinate African Parks Congress Project – Rwanda from 18 to 24 July 2022	EUR	130,000
16	Jaringan Kerja Penyelamat Hutan Riau (Jikalahari)	Indonesia	2022	The specific objectives of the project are as follows: 1. To build a knowledge base of antecedent conditions and development needs and priorities that help inform the design of locally responsive jurisdictional programs in different economic, political, and ecological contexts and national actions that incentivize and enable JP implementation at scale. 2. To co-design nested ToC (Theory of Change), ToA (Theory of Action) and MEF (Monitoring, Evaluation Framework) that catalyze finance, collaboration, collective leadership and planning to support the implementation of locally responsive JPs. 3. To co-design a national/overarching ToC, ToA and MEL that enhances the durability, scalability and effectiveness of JPs, while strengthening complementarities between JPs and international market demands, jurisdictional certification initiatives and national/provincial policy.	IDR	723,000,000
17	Forum DAS (Daerah Aliran Sungai) Provinsi Sumatera Selatan	Indonesia	2022	The specific objectives of the project are as follows: [1]: To pilot and establish a community-based business model to improve community livelihoods and foster mangrove restoration in Banyuasin Regency; [2]: To establish appropriate policies and frameworks that are in place at all levels for stakeholders to implement and replicate business models and mangrove restoration in South Sumatra. [3]: To build a baseline of knowledge in Banyuasin Regency through conducting baseline studies on the community, livelihood practices, key stakeholders, financial and economy studies.	IDR	457,641,735
18	International Tropical Timber Organization (ITTO)	Japan	2022	Support to the establishment of the World Mangrove Center	EUR	23,262
19	Lancaster University	United Kingdom	2022	1. To provide Atewa Landscape platforms the type of empirical evidence needed to design actionable and desirable pathways for reducing the negative environmental footprint of smallholder commodity production that provide tangible social co-benefits. 2. To support the project in communicating this evidence to global audiences through development of scientific products	EUR	108,009

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
20	Forum Komunikasi Masyarakat Sipil Kabupaten Sintang	Indonesia	2022	The specific objectives of the project are as follows: 1. To build a knowledge base of antecedent conditions and development needs and priorities that help inform the design of locally responsive jurisdictional programs in different economic, political, and ecological contexts and national actions that incentivize and enable JP implementation at scale. 2. To co-design nested ToC (Theory of Change), ToA (Theory of Action) and MEF (Monitoring, Evaluation Framework) that catalyze finance, collaboration, collective leadership and planning to support the implementation of locally responsive JPs. 3. To co-design a national/overarching ToC, ToA and MEL that enhances the durability, scalability and effectiveness of JPs, while strengthening complementarities between JPs and international market demands, jurisdictional certification initiatives and national/provincial policy.	IDR	723,000,000
21	Globe Consulting sarl	Democratic Republic of Congo	2022	1. Lead the local teams of personnel involved in the daily project activities and develop their capacity to perform according to international labor standards. 2. Prepare and maintain proper administrative and financial documentation in the scope of the above-mentioned activities such as reports, mail, e-mails, contracts, accounting, documentation (receipts, invoices, petty cash reports, bank statements, etc.); 3. Closely monitor expenditure and provide guarantee against non-eligible expenditure. 4. Upon request from CIFOR's Project Manager, contribute on CIFOR's technical report to donors, and assist CIFOR and its partners in audits, evaluation, monitoring and other type of controls. 5. Facilitate organization and enhance project efficiency in terms of institutional behavior of supported human resources (relationship management, assets management, safety); 6. Support negotiation processes to prevent conflicts, assist in conflict resolution, defend CIFOR and CIFOR partners' interests including legal mitigation if deemed necessary. Specific responsibilities will include: a) To attend to CIFOR's instructions and requests. b) To maintain proper administrative, contractual and accounting documentation and associated documents for all engaged human resources. c) Inform CIFOR promptly on any issues pertaining to specific assignment objectives. d) Technical reports will include all needed timesheets and workers' attendance lists, in addition to a brief description of the duties completed by hired staff.	EUR	251,908

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
22	Häme University of Applied Sciences	Finland	2022	HAMK will provide the technical expertise in: 1. Expert on sustainable tourism VC, capacity building and human rights 2. Product development and market access expert	EUR	156,113
23	IFPRI	United States of America	2022	This project will contribute to the implementation of the Women Land Rights Initiative IFAD project, specifically in the implementation of work in Kyrgyzstan and the completion of Knowledge Management activities under Component 2. The proposed Consortia integrates CGIAR Centers and builds on the collective expertise of The Alliance of CIAT and Bioversity, ICRAF and IFPRI in the CGIAR Programmes on Forest Trees and Agroforestry and Policy Institutions and Markets	USD	55,365
24	Land Equity International Pty Ltd (LEI)	Australia	2022	LEI Scope of assignment • Develop toolkits • Pilot toolkits on TLI & VGGT alignment • Support capacity development of state and civil society across the project • Identify BTL investor and civil society resource, capacity and partnership needs and perform match-making/brokering and partnership formation activities • Community of practice establishment • Liaise with national and regional donors and government in Asian region	USD	839,285
25	Leibniz-Centre for Marine Tropical Research (ZMT)	Germany	2022	Support to the establishment of the World Mangrove Center	EUR	29,375
26	Mtandao wa Jamii wa Usimamizi wa Misitu Tanzania	Tanzania	2022	To implement the low-cost forest monitoring in Rufiji district Tanzania district. This will entail piloting digital village forest monitoring with village natural resource committee in Rufiji	EUR	50,045
27	Nong Lam University	Vietnam	2022	To support policy makers in Vietnam in developing policy options, to generate and mobilize funding for mangrove protection in Vietnam.	USD	30,000
28	Observatorio de Territorios Étnicos y Campesinos of the Departamento de Desarrollo Rural y Regional of the Facultad de Estudios Ambientales y Rurales of the Pontificia Universidad Javeriana	Colombia	2022	The objective of this consultancy is to conduct gender analyses in selected field sites in Colombia to inform policy options to enhance women's recognition as rights holders, participation in decision making related to natural resources, and their enjoyment of the benefits from to land and natural resources rights. This analysis will examine gender relations across multiple dimensions including legal aspects; cultural norms and behaviours, perceptions; socio-economic conditions, and political participation. This focus will cover factors that limit, or conversely, favour women's de facto rights, tenure security, and women's access to land and natural resources.	USD	21,800

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
29	Radio TER	France	2022	Engage Radio TER in collaboration with the TERRAFRIK to organize and coordinate African Parks Congress Project – Rwanda 2021 18 to 24 July 2022	EUR	39,325
30	Rationale Advisors - LOA	Singapore	2022	Rationale Advisors (RA) had a leading role in the development of the approved submission. RA was actively involved in every step of the submission and negotiation process. In the implementation phase of this project CIFOR and Rationale Advisors will continue to work very closely on each aspect of the project. Rationale Advisors will ensure oversight over the “core” services of the secretariat. Project services will include: (i) political advice for intergovernmental and governance meetings; (ii) advice on the governance structure of the secretariat; (iii) Advice and support the secretary meetings including logistics and record keeping.	GBP	416,404
31	Resources and Synergies Development SIA	Latvia	2022	To facilitate CIFOR and its Partners in: - Leadership and infrastructure development strategy; - Procurement in consultation with CIFOR Project Manager; - Administrative support, accounting and monitoring of expenditure related to infrastructures and equipment; - Logistics; - Negotiation and conflict resolution; - Visibility; and - Infrastructure development, equipment and maintenance.	EUR	3,305,580
32	SAILD - Support Service for Grassroots Development Initiatives	Cameroon	2022	The general objective of this research is to take stock of the impacts of twenty years of community forestry in Central Africa and to analyze the mechanisms and processes that have prevented rural populations from being the main beneficiaries of this approach. The research will be conducted by a post-doctoral fellow and three master's students. This research will be implemented in the three most advanced countries in the application of community forestry in Central Africa: Cameroon, Gabon and the Democratic Republic of Congo.	EUR	50,948
33	SNV Netherlands Development Organisation	Netherlands, The	2022	SNV Scope of assignment • Support annual appraisals of enabling environment • Liaise with external stakeholders in the Africa region, Mozambique, Ethiopia, Ghana • Conduct due diligence and needs assessments • Document and disseminate experiences and lessons learnt from Mozambique, Ethiopia, Ghana • Establish BTLs in Mozambique, Ethiopia, Ghana • Establish and facilitate MSPs in Mozambique, Ethiopia, Ghana • Establish CoPs in Mozambique, Ethiopia, Ghana	USD	3,170,229

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
34	Stockholm Environment Institute	Sweden	2022	Review information and opportunities for fisheries value chains and sustainable agreements in the Rupununi based on existing information, field work and interviews with the SWM Program team.	USD	22,319
35	The Center for People and Forests (RECOFTC)	Thailand	2022	RECOFTC Scope of assignment: • Support annual appraisals of enabling environment • Liaise with external stakeholders in the Asia region, Laos and Myanmar • Conduct due diligence and needs assessments • Document and disseminate experiences and lessons learnt from Laos and Myanmar • Establish BTLs in Laos and Myanmar • Establish and facilitate MSPs in Laos and Myanmar • Establish CoPs in Laos and Myanmar	USD	1,414,175
36	The Environmental Protection Agency of Ghana	Ghana	2022	EPA to organise and coordinate a Mine Reclamation Working Group that will be comprised of stakeholders from Kwaebibirem Municipality and Atiwa West District of the Eastern Region, Ghana. The purpose of the Working Group will be to deliberate approaches and constraints to successfully reclaiming decommissioned and abandoned mining sites in the Kwaebibirem-Atiwa West landscape to productive land uses	EUR	22,617
37	The Institut de Recherche en Ecologie Tropicale (IRET)	Gabon	2022	To support the implementation of the project 'Creating an Evidencebase for developing and evaluating interventions to reduce unsustainable bushmeat hunting in Central Africa'.	USD	35,600
38	The Institute of Agricultural Research for Development	Cameroon	2022	CIFOR is entering a partnership with IRAD for the implementation of the INNOVACC project which aims to improve farmers' and pastoralists' capacities to adapt to climate change and institutions' ability to enable this adaptation. The project also seeks to empower women through the development of non-timber forest and agroforestry product value chains that are resilient to climate change. Youths will be supported for the creation of green jobs.	EUR	256,436
39	The Natural Resources Institute Finland (Luonnonvarakeskus)	Finland	2022	LUKE will provide the technical expertise in the three fields: • Agribusiness VC, certification & CBA, LCA, SLCA expert • Gender, social equality & participatory methods in innovation expert • Food and nutrition security and food safety VC expert	EUR	216,073

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
40	United Nations Environment Programme (UNEP)	Kenya	2022	UNEP is a SAGU implementing partner that brings in expertise on global inclusive value chains and business/ private sector support in landscapes. The objective of this partnership in the preparation phase is to find a detailed agreement on the full proposal package, and in particular on UNEP's role and budget for implementation of the SAGU project. To achieve this, UNEP will provide a critical contribution in developing the project design for the SAGU program. To do so, UNEP representatives will actively participate in ToC workshops, national kick off meetings, consultation meetings, field missions, knowledge management workshop, budget workshops, coordination workshops and the role-staff workshop.	EUR	125,523
41	Universidad de Antioquia	Colombia	2022	The objectives of the assignment is to develop and present a series of standardized protocols for the assessment of pathogen prevalence in wildlife and humans for priority zoonotic diseases. To validate the standardized protocols in collaboration with the One Health platform. In close coordination with the SWM team (One Health Coordinator, Site Coordinator, Country Coordinator, and Site Manager), the consultant is responsible for developing and presenting a series of standardized protocols for the assessment of pathogen prevalence in wildlife and humans for prioritized zoonotic diseases. Those protocols must be shared and discussed within the collaborative platform and validated after extensive consultation with its members. Additionally, the consultant must understand the roles and responsibilities of all One Health sectors.	USD	33,000
42	Universitas Palangka Raya	Indonesia	2022	1. To build a knowledge base of antecedent conditions and development needs and priorities that help inform the design of locally responsive jurisdictional programs in different economic, political, and ecological contexts and national actions that incentivize and enable JP implementation at scale. 2. To co-design nested ToC (Theory of Change), ToA (Theory of Action) and MEF (Monitoring, Evaluation Framework) that catalyze finance, collaboration, collective leadership and planning to support the implementation of locally responsive JPs. 3. To co-design a national/overarching ToC, ToA and MEL that enhances the durability, scalability and effectiveness of JPs, while strengthening complementarities between JPs and international market demands, jurisdictional certification initiatives and national/provincial policy	IDR	1,084,502,892

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
43	Université Catholique de Louvain	Belgium	2022	Roles of UCLouvain in the consortium: Expertise on information systems, particularly in the production of a Geoportal integrating all OFAC tools and connected to national, local and regional monitoring systems; mapping of forest types using SENTINEL-2 images and forest cover monitoring system based on Sentinel-1, all while involving and strengthening national expertise for greater autonomy in the production of information.	EUR	247,520
44	Université de Kisangani (UNIKIS)	Democratic Republic of Congo	2022	The Subgrantee is agreed to provide the following services during the agreement period: a. MSc-related activities: - Select, recruit, advise, supervise and conduct MSc courses for at least 15 MSc students of which 10 should publish. b. PhD-related activities: - Contribute to supervision of PhD students so that at least 4 Doctoral theses are defended. - Contribute to supervision of and collaboration with PhD students so that at least 8 scientific articles are accepted in peer-reviewed, impact factor journals. c. General research-related activities: - Conduct action-research activities resulting in at least 5 articles published in impact factor journals as lead-author (Professors of faculties supported by the FORETS II project). - Conduct action-research activities resulting in at least 10 articles published in impact factor journals as co-author (Professors of faculties supported by the FORETS II project). d. Academic institutions and building of networks: - At least 2 South-South partnership agreements signed with academic institutions. - At least 2 South-North partnership agreements signed with academic institutions. e. Fund-raising and co-financing of FORETS II: - Participate in at least 3 calls for proposals. - Contribute at least EUR 100K in co-funding to the FORETS II project.	EUR	115,757
45	University of Helsinki	Finland	2022	VITRI will provide expertise as per the agreed upon workplan	EUR	179,484
46	University of Kinshasa	Democratic Republic of Congo	2022	Knowledge for action to protect tropical forests and enhance rights	USD	60,102

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
47	University of Malaga	Spain	2022	Through a multidisciplinary and interdisciplinary approach embedded into the field of “pathogeography”, this work aims at increasing our ability to search for disease drivers, especially by increasing the understanding of the linkages between zoonotic diseases and animal communities. The SWM Programme will deepen the understanding of the biogeography and spatio-temporal dynamics of two zoonotic diseases, Ebola Virus Disease (EVD) and West Nile fever (WNF), both viral diseases transmitted by flying vertebrates, i.e. birds and bats. These two groups are known to participate as reservoir, vector or disease-amplifier species. Activities will be carried during one year focusing on 2 SWM sub-regions that are impacted by EVD and WNF: Sahel and central Africa. The results of the research will be used to provide useful models that can be adapted/extrapolated to other human-wildlife diseases situations in other SWM sites and later to other OACPS countries in a second phase. Ultimately, this work will highlight areas that are likely to be more impacted by the two diseases and the models will serve as a basis for predictive tools that can support decision making in development planning, and policy and regulation reforms that address zoonotic risks prevention and mitigation.	EUR	23,412
48	Wetlands International	Netherlands, The	2022	The objective of this partnership in the preparation phase is to find a detailed agreement on the full proposal package, and in particular on YLBA’s role and budget for implementation of the SAGU project. To achieve this, YLBA will provide a critical contribution in developing the project design for the SAGU program. To do so, YLBA representatives will actively participate in ToC workshops, national kick off meetings, consultation meetings, field missions, knowledge management workshop, budget workshops, coordination workshops and the role-staff workshop. YLBA will lead the field mission to West Kalimantan	EUR	90,734
49	World Agroforestry (ICRAF)	Kenya	2022	CIFOR is entering into a partnership with ICRAF for the implementation of the INNOVACC which aims to improve farmers’ and pastoralists’ capacities to adapt to climate change and institutions’ ability to enable this adaptation. The project also seeks to empower women through the development of non-timber forest and agroforestry product value chains that are resilient to climate change. Youths will be supported for the creation of green jobs.	EUR	2,320,824

#	Partner Institution	Partner Country	Contract Year	Purpose of agreement	Currency	Value
50	Zambia Community Based Natural Resource Management (CBNRM) Forum	Zambia	2022	Promote the use of the landscape approach in Zambia for livelihoods and adaptation to climate change, democracy and governance work under the project “Operationalising the landscape approach for biodiversity benefits: policy, practice and people”	EUR	55,701
51	Wildlife Institute of India	India	2022	The major aim of the proposed project is to use the Andaman Islands as model ecosystem to understand how mangrove ecosystems respond to SLR and to build capacity among stakeholders in research and management of mangrove habitats. We will create long term, permanent mangrove monitoring plots across this naturally occurring SLR gradient to address the following specific objectives: 1. To quantify how the mangrove vegetation community shifts with SLR and what factors are responsible (flooding duration, tidal height, salinity, sediment load) 2. To assess how the mangrove carbon stocks, sediment accretion, and elevation change rates responding to SLR	USD	46,057
52	World Agroforestry (ICRAF)	Kenya	2022	ICRAF Scope of assignment: • Support design of UO-level methods/approaches • Technical support to country teams and quality control (Myanmar, Ethiopia) • Contribute to development of toolkits • Capacity-building support at country level • Contribute to external communications and visibility • Contribute to global engagements and events • Contribute to M&E design and implementation	USD	1,093,229
53	World Agroforestry (ICRAF)	Kenya	2022	Carry out joint activities among ICRAF and CIFOR within WP 1, 2, and 4	USD	175,061
54	Yayasan Riak Bumi	Indonesia	2022	To improve these communities’ livelihoods and protect the remaining orangutans and their habitat, CIFOR and Riak Bumi will conduct the following activities: • Facilitate development of micro-hydropower, clean water supply and Non-Timber Forest Products (NTFPs) value chain; • Facilitate participatory rehabilitation of degraded areas; • Facilitate and train local communities to conduct participatory forest patrol and orangutan population monitoring; • Facilitate legalization of customary forests and awareness raising programme.	IDR	1,967,117,272

* Additional budget to an existing contract - Partnerships that started previous years but had a Costed extension signed in 2022

#	Partner Institution	Partner Country	Original Contract Year	Extension Year	Purpose of agreement	Currency	2022 Value
55	ADE sa*	Belgium	2018	2022	to build an impact monitoring and evaluation system for the EU-FLEGT Action Plan 2017 based on a well-designed global Theory of Change. This will involve identifying relevant indicators drawn from existing secondary sources, developing a database system to regularly compile and manage indicator information, and developing a reporting protocol drawing on this data	EUR	22,605
56	ARCADIA SIT S.r.l.*	Italy	2018	2022	to provide IT services for the maintenance and further development of the OFAC website	EUR	21,600
57	Caiman House Inc.*	Guyana	2019	2022	The goal of this project is to minimize the annual losses and stabilize the population of P. unifilis in the North Rupununi region of Guyana through a long-term monitoring program, headstarting, an increase in awareness of species threats, collection of population and natural history data, and creation of community-based turtle conservation programs.	USD	17,000
58	Entraide Multisectorielle pour la Survie et le Développement en RDC (EMSude-RDC)*	Democratic Republic of Congo	2020	2022	Our mission is to promote the health and wellbeing of the Congolese people by contributing to eradicate malnutrition through a multisectoral strategy including 4 main components: - Nutrition/Food security - Water – Sanitation - Hygiene - Nutrition and health education - Evaluation of nutrition and health projects EMSude-RDC uses integrated and multisectoral approaches to improve health and wellbeing of vulnerable populations, particularly women and children.	EUR	15,587
59	Forests Resources And People (FOREP) - Cameroon*	Cameroon	2018	2022	Assist CIFOR in providing oversight and support on study about malnutrition in women and children Takamanda region in Southwest and Ngato, East region	EUR	26,952
60	Guyana Wildlife Conservation and Management Commission*	Guyana	2018	2022	To support the SWM project implementation in Guyana site	USD	300,000

#	Partner Institution	Partner Country	Original Contract Year	Extension Year	Purpose of agreement	Currency	2022 Value
61	North Rupununi District Development Board*	Guyana	2019	2022	to implement the NRDDDB fisheries management plan and the environmental education program	USD	90,000
62	Resources and Synergies Development SIA*	Latvia	2020	2022	This assignment aims to facilitate CIFOR and its Partners in project management, financial controlling and other management skills in-country for the Combined Heat and Power Plant	EUR	134,672
63	Resources and Synergies Development SIA*	Latvia	2020	2022	This assignment aims to facilitate CIFOR and its Partners in project management, financial controlling and other management skills in-country	EUR	243,108
64	Rupununi Livestock Producers Association Inc. (RLPA)*	Guyana	2019	2022	to Implement start-up activities of the SWM livestock programme component plan	USD	98,110
65	South Central Peoples Development Association (SCPDA)*	Guyana	2019	2022	support the SWM project by promoting the care of, conservation and sustainable management of wildlife species and habitats across Wapichan Wiizi	USD	109,246
66	South Rupununi Conservation Society*	Guyana	2018	2022	In coordination with the country coordinator, Site manager and Site coordinator, and as part of the above mentioned component 2 of SWM-Guyana, the outreach and environmental education expert will be responsible for: - the development of the environmental education program in the South Rupununi and Central - Guyana, including fishing and terrestrial wildlife, based on traditional knowledge and on the principles of sustainable use. - Outreach at local level through various means of communication to be identified - Facilitation of meetings with local institutions, particularly indigenous communities	USD	60,500
67	Universiteit van Amsterdam (UvA)*	Netherlands, The	2019	2022	University Amsterdam will serve as the host institution and provide supervision roles for up to 4 PhD candidates through 1). participate in selection process; 2) Ensure the enrolment of each candidate; 3). Coordinate with CIFOR team on student progress and provide regular report; 4) Support student's field work preparations and data analysis and monitor their progress in the field.	EUR	69,045

#	Partner Institution	Partner Country	Original Contract Year	Extension Year	Purpose of agreement	Currency	2022 Value
68	University of British Columbia (UBC)*	Canada	2019	2022	The University works under this agreement to perform a number of project related activities, including desk-based (legislative reviews and GIS analysis) and in the field sites (participatory monitory and stakeholder perception analysis), provide scientific advice, attend project workshops, and also recruit and co-supervise an additional PhD candidate to perform comparative studies across the three landscapes.	USD	139,044
